

MID TO LATE VEG - WEEK 2-4

LIGHTS ON 18-24 HOURS	LIGHTS OFF 0-6 HOURS
(700 - 1100 umol)	
82° - 88° F	82° - 88° F
74% - 80%	74% - 80%
1000 - 1300 ppm	Ambient

HOW TO IRRIGATE

Irrigation Style:
Vegetative

Overnight Dryback:
10-15%

Replenishment Shot Size:
1-3% of the pot/cubes volume.

Replenishment Shot Frequency:
Start 1-3 hours after lights on. Every 15 minutes until runoff is achieved.

Refreshment Shot Size:
2-3% of the pot/cubes volume.

Refreshment Shot Frequency:
Every 1-3 hours after replenishment shots have finished. Looking for a 2-3% dryback between irrigations. You will not always need refreshment shots. Stop waterings atleast 1-3 hours before lights out.

*We suggest topping/pinching your plants between 8-12" in height. For longer Veg times and/or to produce larger/bushier plants extend this process and continue to top/pinch the tops of your plants, as well as implement super cropping techniques of bending the branches down.

FEEDING SCHEDULE

V1™
5g Per Gal

V2™
5g Per Gal

ROOT
DRIP™
1mL Per Gal

OVERNIGHT DRYBACKS
10% - 15%

MOISTURE CONTENT

55% - 60%

45% - 50%

*We recommend using a soil moisture sensor for accurate moisture percentage readings in the growing medium. FloraFlex Coco has max water holding capacity of 60%.
